(CODESRIA)

Africa Development is the quarterly bi-lingual Journal of the Council for the Development of Economic and Social Research in Africa (CODESRIA).

It is a social science journal whose major focus is on issues which are central to the development of society. Its principal objective is to provide a forum for the exchange of ideas among African scholars from a variety of intellectual persuasions and various disciplines. The Journal also encourages other contributors working on Africa or those undertaking comparative analysis of third world issues. One issue of the Journal a year is focused on a particular theme and guest-edited by a specialist in the field.

Africa Development welcomes contributions which cut across disciplinary boundaries. Articles with a narrow focus and uncomprehensible to people outside that discipline are unlikely to be accepted.

The Journal is abstracted in the following: International African Bibliography; Documentatieblad; Abstracts on Rural Development in the Tropics; Documentationselein Africa; A Current Bibliography on African Affairs.

Africa Development is published four times annually by CODESRIA. All editorial correspondence and manuscripts should be sent to:

The Editor,

Africa Development,

- Current Individual Copy:	\$ 7 US
- Back Issues:	\$10 US

Claims for undelivered copies must be made no later than three months following month of publication. CODESRIA will supply missing copies when losses have been sustained in transit and where the reserve stock will permit.

Afrique et Développement est le périodique bilingue trimestriel du Conseil pour le Développement de la Recherche Economique et Sociale en Afrique (CODESRIA).

C'est un périodique de sciences sociales qui se consacre pour l'essentiel aux problèmes liés au développement de la Société. Il a pour objectif fondamental de constituer un forum destiné à permettre un échange d'idées entre intellectuels africains de convictions et disciplines diverses. Il encourage aussi d'autres chercheurs travaillant sur l'Afrique ou ceux se livrant à des études comparées de problèmes du tiers-monde. Chaque année, un numéro du périodique est consacré à un thème particulier et pris en charge par un rédacteur extérieur qui est un spécialiste dans ce domaine.

Afrique et Développement souhaite recevoir des articles qui traversent les barrières entre les différentes disciplines. Des articles trop spécialisés ou incompréhensibles aux personnes qui sont en dehors de la discipline ne seront probablement pas acceptés.

Les articles publiés dans le périodique sont indexés dans les index suivants: International African Bibliography; Documentatieblad; Abstracts on Rural Development in the Tropics; Documentationselein Africa; A Current Bibliography on African Affairs.

Afrique et Développement est publié par le CODESRIA et paraît 4 fois l'année. Tous les manuscrits et autres correspondances à caractère éditorial doivent être adressés au:

NEW RELEASE CODESRIA BOOK SERIES

The nature of Agricultural transformation in Africa is shrouded with too many facile generalizations. During the current conjuncture, the most widely used concepts to describe African agriculture are stagnation and collapse.

Challenging these static and simplistic notions, this book demonstrates the diverse and heterogeneous patterns of agrarian change in Africa. Consisting of 13 case studies, the book presents a typology which is reflective of the politico-economic diversity of Africa.

Thus, two "etatist" and two "market oriented" regimes represent the "mineral-rent countries", while the other cases focus on countries which rely predominantly on agriculture. Among the latter, a further classification isolates the specific case of the more environmentally fragile economies of the Sahel. Meanwhile, contributors explore local, national and global dimensions that shape the relationship between the State and agriculture.

The result is an excellent comparative overview of the African experience and portrays the varied process of change in the structures and relations of production and social differentiation.

This new book in the CODESRIA BOOK SERIES, is intended to encourage African researchers to reflect on the changing realities of the continent and to present the outcome to a wide public. As such the book should find a place on any reading list that addresses Agriculture in Africa as well as the continent's overall development.
