THE STATE AND THE WORKING PEOPLE IN TANZANIA

*Issa G. Shivji (Ed.)
(London, 1986)*

The book is the outcome of a National Working Group in Tanzania under the auspices of CODESRIA. The focus is on elucidating relations between the state and the working people in post-independence Tanzania. In addition to a powerful introduction by Issa Shivji, the rest of the six chapters tackle the parliament and the Electoral Process, the Party, Labour Legislation, the State and peasantry, cooperative societies and marketing boards and student struggles. According to one of the recent reviews.

...to try and analyse the crisis in Africa is by no means an easy task. But what makes the present work even more interesting is that it focuses attention on Tanzania. As Issa Shivji puts it, "The Tanzanian state is among the few in Africa which has hitherto managed to sustain a liberal image while at the same time establish a virtual organizational hegemony over its working people and popular classes". **"How did Tanzania achieve this enviable record?** This is one of the questions which this collection of essays seeks to answer.

On the whole the book makes a very valid contribution to political debates going on in Africa. It would be compulsory reading for anyone wishing to understand the nature of neo-colonial societies, the role of the state in destroying democratic organizations.
